Mostepanova and Bilozercher are the best

Iwo Muscovites-Olga Mostepanovn. 16. and Duiltey Bilozerthey, 17, have become overall champions in the Friendship-84. gymnastic competition held in Oleuntuic, Czechoslovakla,

Olga Mosti-pantiva, holder of the 1984 Cup of the USSR, 1983. world beam changion and silver medallist of the 1984 nationat combined event, scored this Impressive auccess at an International postum for the first time. She is not only the best among her transpales, intt also among such brilliam gymnasis as Maxi Granck [GDR], Flanna Ruma (C'zechoslovakia) others She is also noted for having won long ten-point marks to just one evening.

funitry Bilozetchev Interally broke uito adult domain in 1985. The lorner panior kept on wittning the "Moscow News" prize the overall European and world tatles and the Tournament of Soviet Matabus. An Inimy sent him all the padium for quite a time making him miss major national and international events in the stoing, But his first comeback ended in an excellent virtory. He world 59.8 points in the six events fluring the final day of The fact valual championship con-

The following champions are also worth reckening with in the signature events: Billozorches trouppet horse, rings, horizontal bart, Roland Brückner, GDR Hree exercises), Silvia Kroll, CDR tvault). Vladimir Artvomov, USSR [paralle] bars).

Women: Natalya Yurchenka and Moslepanova, USSR Ivanilly, Chauck Juneven bara). Mosiepasova [beam], Gnanck and Mostepaneva litee exerciseal.

The Soviet Icains showed belter results, followed by the LIDS, with bionze going to Bulearly finen's events) and Czechoslovakie i women's evenisj.

Now the season for various other thiernational competitions such as cups and special prize events is approaching. Early 1985 will see the "Moscow News" prize compellitions, the European championship, Interna-I med tournaments and preparations for the world champion-

High level of swimming performance

Rehlad us now are alx days of iwhambae compelliion in the Muscow Olympic pool, Through-9100 viewers who crammed the Samia gave a big support to the SPOLISHOPH: es a result -- 72 na. tonal records of the participating nations, of them five world soi 12 Emupean hesta.

The swimmers competed on a fell programme of 29 events [15] 11 laster times were clocked than in Los Angeles.

All the lilles went to the USSR and the GDR (13 and 16

respectively). As Justial, the CDR women's toom did linely despite the lact flial II hea presed its peak shape laport from II firet places it eslabilished four world records). New names appeared, on the leam but the young ewimmers sxealently opheid the authority

POLITBUREAU WEEKLY MEETING

The Polithureau at the CPSU Central Committee has discussed and approved suggestions put lorward by Kansiantin Chemanko for strangthering the metarial and lechnical base, further industrialization of the construction ladostry and providing assistance for its development. Measures were worked out for the implementation of the suggestions by reflecting them in the draft state plans for 1985 and the 12th Five-Year Plan.

The Polithurean side phones for 1905 and the 19th Pive-Year Plan.

The Polithurean side approved proposals for bringing flown retail prices of a number of consumer gards. This measure which is almed at reising the significant of living of the population, lakes effect from September 1, 1984. The price calls will oncer articles for children, cortain drugs, various types of fextiles, knilwent, as well as household appliances and guods. The

total price cut will make up 2,300 million roubles per annum. At the same time the Polithureau has polulert out the need to furtilies raisa the production at consumer goods and improve their quality.

FROM the SOVIET PRESS

Like in many other developing states, political armygie

inkes place in Indio, centered mound issues of the country's socio-economic development, witten in PRAVDA V. Alexayev.

In this struggle lorces of reaction, octing now on the us-sumption that the worse it is, the better it is, in order to fol-

low their sellish goals, use the poisoned weapons of religious chauvinism, local nationalism and separatism. They try in

this way to split the unity of the working thiss and the work-

ing peasuntry, to detroct their nitentian from the struggle

for their vital rights and interests, to secure a shift to the right in the political areas of India. It is noteworthy that

given all its heterogeneity, the Indian teaction is at one in tis

ontipothy towards any progressive steps inside the country, os well as lowerds the independent toreign political line pursued

by the present Indian Government bended by Printo Minister

The US State Secretory Genige Shultz has addressed ve-

terans of foreign wars with a speech in which he said that

the US military presence in Central Americo served os a

shield whose protection nuckes possible for the United States

to carry and effective diplomacy. Commenting on this speech,

I do not remember my other Washington lendor ussert the

notorious "granbout diplomacy" in its new "Reagun" vorlety

In the context of his address, Similtz spoke of the Wushing-

ton's comes in Central America as a model of "o cummon

sense policy" based on American power. It is evident that

he is nettical by the dubinus karrels won by the leaders of

the Pennigori and the CIA by being in the loreitoni of the

United Stoles' importalist thrust negating Niceringuo and all the progressive forces in the region. Culting for extreme po-

wet methods to suppress the liberation movements in the re-

gion, the chici diplomut from Wushington wishes, of least in

wards, to catch up with and march step in step with the out-

right political luwks during this disquiet election time.

luscism in the Federal Republic of Germony.

ROOTS OF REVENGE-SEEKING SENTIMENTS

Writing in SOVIETSKAYA ROSSTYA, Ernst Henry suya

that of fate, much is being sold about the abrupt increase in

revenge-seeking sentiments and about the revival of nea-

I do not think it is possible to give a simple naswer to the

question about the 1001s of these revenge-sceking offiliades. It is said that this is a matter of this sentiments unony tho

Sudejen, Silestons, Parneruniums and other members of the

so-culled "exile associations". One who thinks in these terms

It is time that the "famil associations" play a certain role in the revenge-seeking brainwasting. Their leaders have load

voices, and they me now saying wint is expected of them,

We heard this inngrage many times before the autrendar of Hitler Germony. Yel, the most important thing does not lie

in "the exilc association" whose louder now is a certain Herr

Czojo. The most important course is rooted much deepst, ly-

Revenge-sceking does not grow of its own occord, in a

space devoid of oir, so to speak. It is angendered by the mil-

liorism hiding behind the acenes.

Without militorism there would hardly be ony uctive or-

gonizations of revenge-seekers and lasetsts. A glanco of the history of Germany in this century would be enough to

This is the tille of on orticle by Igor Belyoyev published in LITERATURNAYA GAZETA.

It seems that isroel sullets from on historical complex,

writes the outhor. Among the country's policy mokers there

doean't seem to be o single person, who like General de Goulls who boldly aloried the talks on Algoria's independence con declore his readiness to give up the Camp David occord, which has already reculied in o

number of colomities, and to agree to come to terms and oc-existence with the Arabs. Those who now dominate the Is-

existence with the Ardos. Those who now dominote the is-raeli esiablishment, just like Jewish community leaders in the USA and Western Europo, still think of things that are incom-potible— o stabilization of the tarosti economy and... con-tinuation of the wars against the Arabs. They dream of vic-tory. Without it, they think, there will be no "Great Israel".

Il scens the largell establishment has come up with some-

thing politically unexpected but this is only a tirot impression.

The results of the July elections show that no Zionici political

party in the country to copoble of reacting positively to the present situation either in loraci, in the Middle Boat or ciso-

ing in the cluss roots of revenge-seoking sentiments.

Svyatoslav KOZLOV TWO APPROACHES TO CONFIDENCE

ii the Ilma when NATO's armod forces stert all kinds of militory exarcises and manoeuvres which sum up the combat preparednass of its troops throughout tho yeor, it is raported from the NATO Haodquarters for Caston, Bolgium, that mere than 250,000 servicemen are to take pari in military osorcisos to be sleged from northarn to southern Europe, i.e., from Norway to eosi-3 and mid November.

in oil, 25 moin ground, air ond novot oxarcises ore to be held within the framework of the annuni NATO monosuvros codenamad Autums Forge-84.

This your, the NATO militory monoeuvros will be hold la on extremely tense sliualien compile coted by US anti-poace policies, particularly the doployment of Americae naw medium-raego missitos in soma Wasi Europaon countries. Concern is coused by the growing scale of the ma-noauvres, the lacreasing aumbor ol troops and waapons involved. Whos such major forces ore concentrated, it becomes difficalt to find out whether this is done for training purposes or sarves as as operative deploy-mnat of forces poised for militi-

causes and gives rise to the ne-cassily of taking appropriate massures to ansure security on the other side. All this leads to growing lansions.

This situation mekos particulary imperctive the adoption of reliable moosures which can to ilmo ofiminate ony suspicions on both sides and to build up muluol confidence.

sue is among others which are baing discussed at the Confersaco on Confidence and Sacurily Building Measures and Disorment in Europe. The Soviet Union attoches great importance to this forum the role of which increases as the military throot becomes more glarleg. The conterence will be oble to me at the hopos invested in til if if pro-duces and undortakes practical steps capable of equiralizing the thrent of wns.

Procending from this, the Soviat Union has put lorwerd at the conference a broad programmo of measures whose imlamaatsion would resion confidonce in Europe and consolidata the overall security.

Ol particular importanco among the Soviet proposals is the need for the eacient stales

sume the obligation not to be the tirst to use nuclear weapons. trealy on the non-usa of force in internollonal relations batween the Worsow Troaty mem-ber-countries and NATO. II is assy to see that the commitment

to provent nucleor wor, end wars in genaral, bolwson the contracting parties would be e most imposing confidence-buffdth may be recalled that this is-

noasuro and a bottor guoranteo for aqual security. An officilive slep towards building confidence and curbing the orms raco could be provided by the conclusion of an agreement on treazing and raducing militery spendings.
Such o dacision would become
the most immediala and proclical step towards actual disar-

Coefidence and socurity could also be promoted by ridding Europe of chemical weepons, which, due to their transherous which, due to their trancherous nature, can be used by the aggressor for a sudden massive attack. Setting up nuclear-free zoess in different parts of the coaffinent would also be helpful in reducing the threat of auclear ways.

The Soviet proposnis also con-thin additionni confidence-build-

ing measures of technical militory character. The nawly pro-posed meosures ere more signilicest in content and broader in scope then those provided for by the Final Act of the 1975 Helsinki Conference. Among other things, this includes ilmi-tations on the scale of millions manoeuvros, preliminery sottilication of mojor militery exercises fivolving ground iroops, air lorcas and nevies and ebout major movements and eiriliting ol troops, and exchange of ob

Unlike the Soviel Initiatives the NATO proposels ere onesided, and they contain provi-sions which are obviously unacceptobla for the Soviet Union and its cilies. The NATO counirles ere seeking unliateral ed-vanleges for themselves. They ore more interested in obtaining intelligence Informolioa the observing confidence-build-

mon sense, they are hisdering the spread of confidence-build ing measures throughout the areo over which the forces and weopons of the two sides can be daployed ond lounched into action. While demonding that the Soviet territory should be "screened" as lar es the Urols, thay do not wont to subject to additional coetrol the Atlantic Ocean and the American terri-lory, seeking in this way to by-pass the confidence-building

mansures. Rejecting the constructive Soviet proposals, the NATO countries are bent on reducing the talks to nerrowly technical mas-sures. These ped other strategies aspose the American unwillingaess to solve sarlously and ras-

GEOTHERMAL POWER PLANT DESIGNED FOR TRANSCARPATHIAN AREA

tZVESTIA writes that Ukruine's liret experimental geothernui power plant is being deelgned. The site is neor the Transcarpathian village of Nizhniya Remety where the 4.2 km ptt confirmed scientific hypotheels about local underground tocks healed to aver 200°C. The temperature will make it possible to build an underground boiler for the would-bo plant. The technologically difficult venture is worked out by engineers in Moseow, Leningrod, Klev, Azerbaijan, Georgio ond Dagheston. The power of the experimental plant will ba under 2,000 kilowatte, although experts predict a similar plant with a capacity of one million kilowalts which will save as touch as two willion tonnes of reletence tuel annually. Its perintmunce will be an improvement on the Khmelnitakayn olomic power plont. The stotion will be ecologically cleun.

HELPING TO CHOOSE A PROFESSION

The choice of a profession is one of the chief problems in people's life. Can it be facilitated?

In a way, a correct chaice of vocation can be made with the help at vocational centres which exist in away cities and give necessary consultations, writes the newspaper SOVIETSKAYA ROSSIYA, in ony ceec, as psychological research carried out at the USSR Inetito ni Proicssional Troining has shown, nmong those who lallowed the advice of specialies at these centres, only 20 per cent regretted the choice inter. Among those who did not follow the advice the perce opposite: only 20 per cent remained faithful to their

Unfortunately, the possibilities of vocational centree lunctioning of public education departments are rother limited. Vocational contres attached to big industrial enierprisee and associations are much more eiticient.

Take, for instance, the 2nd Waich-Making Factory in Moecow, Svellana in Leningrad and Kommutator in Rigo. They are equipped with modern diagnostic opporolusee end have all the necessary information about rades which won! manpower of given enterprises,

SHOULD WE SPARE OUR HEART?

The answer to this question was provided by on experiment corried out jainity by Moecaw University physicians and biologists, writes SQTSIALISTICHES-KAYA INDUSTRIYA (Socialiel Industry). Experimentore were given problems to solve while recearchere look up their electrocardiagroms. It turned out that overyone, to some extent, was nervous during the experiment. Heartheat abarphy occelerated in the case of those who solved the problem correctly, while only a slight increase in the heartbeat at those who could eoive ii was registered.

In other words, only those who switched on their emotional etress prior to occending the "intellectual

ladder" succeeded. The heart boole laster in this cesc. But after the ex-periment it hirned out that the successful ones brought hack to normal their pulses in two to three minutes. The ones who latted registered higher load on the heart for a longer time alterwards. This is explained by the loct that negative emotione arise during follure and cantinue to hold the heart in suspense,

The feelings of diesalisfaction, vexation and spile not only put people into bad mood but also offect the nervoue aysteo ond the hearl. Sometimee people try to evold solving o porticular problem in an ottempt to escape emotional disturbances,

but the impassionate electrocardiogram tape chows the THE STUDY OF THE TOMSK

KUPCHENKO

It is usually the spontaucity, livelless and charm of young debulant netresses that eltract endleaces. But first appending on the acreen at ta, irtue Kunchoeko siruck peoplo lu quita a dillerest wey — by her projound and airong nature, by a paradoxical combination of laner clear-cuf individuality combined with modest and uspreteotiona looks. She list appeared on the screen na Liza Kalitina, in the classical role of a "Turgency girl" in the fitm version of this writer's novel "A Nest of Gentlefolk". The "Turgeney girl" is a particularly Russian con-cept, it implies a great degree of apiritud and moral lorce, self-sacrifice, a heighlened sense of duty, purity of emotions and a clear conscience combined with extreordinary tentininity, epirftual fragility, modesty and reserve. This was the rich loner world that was visible in Liza performed by Kupchenko.

to Irtoa Kupchenko another classicat end marvellous role - that of Sonya lu Iba acreen vorsion of Chekhov's "Uncle Vanys". Liza Kalitins gave up lova and happiness for the sake of God. Sonya who was despersioly in love will someone who dido't love ber, was dealed beppiness by fate. Realizing this ahe begao to dissipate the wealth of her acul on people unworthy of such accritices. She was different from Lize, having her own approach to the world. Yel like two characters siem from the same root: the concepis of the "Turgeney girl" and the "Chekhovien boroino" lievo e lot in common.

Kupchenko's third classical role was Princess Trubalskaye to the film "Star of Enchanting Happiness'. Once again she was expected to embody both a specific character and e whole concept - this lime that of a "Docembrist wife".
In other words she had to play one of those wonderful women who aet oil lor voluntery exile in Siberia, ioliowing thoir husbanda who lailed to overthrow the laer in December 1825. Such women who had to give up their nativa-bomes, reletives and way of life possessed enor-mous inner strongth. Trubetskeye was ready to do all flus evoc though she did not share ber

After those force roles it seemed that the ectress was destined for classical peris only. Kup-chenko's predification for heightened omotious would not work, it seemed, in a modern tilm, for, alas, in our rational ago things heve got simpler in this respect. However, the actress with the help of our top-class directors llyo Averbakli, Yuli Raizman, Vndim Abdrasbituv and Nikile Mikhelkov proved that such predic-tions were mistaken. In Illms "Someona Else's Leiters", "A Strange Womm", "The Turn", "A Romance About Those in Love" Kupchenko gives a brilliant interpretetion of women who are our contemporaries, con-alderably enriching our idea of lodsy's heroine. She managed to persuode up that the best of women lodsy are libes who bove inberiled the lotty epiotious, moral force, lack of compromise purlly of the remarkable women of the post, depicted splendidly by the ecircus on the
